

## RESOL press release

Hattingen, 01 June 2011

### New at RESOL's Intersolar booth 2011

**A second RESOL family has sprung up in addition to the successful DeltaSol® controller family – the new FlowSol® pump stations.**

The single-line station **FlowSol® S** has already been introduced at this year's ISH trade fair in March. Her „big sister“, the twin-line station **FlowSol® B**, will make her debut at Intersolar. For both stations, a variety of pumps and controllers are available for choice. Like all RESOL pump stations, they are pre-assembled, contain all vital hydraulic components and are easy to install. In addition to that, the FlowSol® B is equipped with an insulation casing featuring an innovative hinged controller panel, allowing for quick and easy access to the hydraulic components without dismantling the controller.

Of course, all other current RESOL products will be on display in Munich as well – stop by for a visit and let us convince you: hall B.1, booth 590.

The RESOL team looks forward to meeting you!
