**RESOL press release**

Hattingen, 03 March 2015

Now with extended functions: The VBus.net Internet portal

The RESOL VBus.net Internet portal is now available with an extended range of functions. In addition to the practical Dashboard – a personalised welcome page users can arrange for themselves – the following features can be used with a PRO access:

- Weather information for the location of your system
  Displays the outdoor temperature, the weather conditions and the expected sunshine hours
- Simplified filter creation
  Define data points via Drag&Drop and format them for further use
- Extended live system editor
  design your own captions, use your own component pictures and system graphics
- Data refresh every minute
  For more detailed diagrams, direct progress observation and evaluation
- Sharing access rights
  e. g. with your installer or energy consultant for information and maintenance purposes
- Individually configurable notifications and reports via e-mail
  Define and receive regular data reports or messages for certain fault conditions
- Error protocol
  Keep an eye on your monitoring functions

Try VBus.net – a demo Datalogger will be available right after signing up! Access to the basic version of VBus.net is free of charge.

Further information can be found at www.resol.com – or test it on www.vbus.net!
