

RESOL press release

Hattingen, 10 April 2015

Close to the pulse of time – VBus®Touch HC now supports the Apple Watch

With **VBus®Touch HC** you can start using the brand-new **Apple Watch** for controlling your heating system right when it hits the market on April 24, 2015. In addition to the iPad and the iPhone, VBus®Touch HC will then also support the Apple Watch.

Never before has it been this easy to communicate with your heating system – e. g. while travelling, you can heat up your home before you return or adjust your heating to counter changing weather conditions with just a tap to your wrist – no problem with VBus®Touch HC.

Further information about VBus®Touch HC can be found at www.resol.com.
