

RESOL press release

Hattingen, 07 July 2015

The safe and easy way to high efficiency – with RESOL

With the conversion to high-efficiency pump technology, craftsmen, service technicians and lab workers are faced with a whole new bunch of challenges. The RESOL product portfolio offers you plenty of possibilities for using high-efficiency pumps:

✓ New installations

Our controllers are equipped with PWM and 0-10 V outputs that can control HE pumps. Pre-connected pump stations are available with integrated HE pumps and matching controllers!

✓ Retrofitting

The **PSW** Pump signal converter series translates the speed control signal of the controller into an input signal suitable for a HE pump. Thus, conversion to HE technology is possible even for controllers without a corresponding output.

✓ Maintenance

For service and maintenance of systems with high-efficiency pumps, RESOL offers an indispensable tool – the **HE-Check**. With the HE-Check, the function of the pump and the signals of the controller can be checked quickly and easily.

Both the PSW series and the HE-Check **can be used with any pump and controller brand**. Further information can be found at www.resol.com

The RESOL HE-Check for safe and easy system maintenance

Extra convenient for retrofitting: the PSW Premium Set with pre-connected Wilo Yonos Para HE pump
