

## RESOL press release

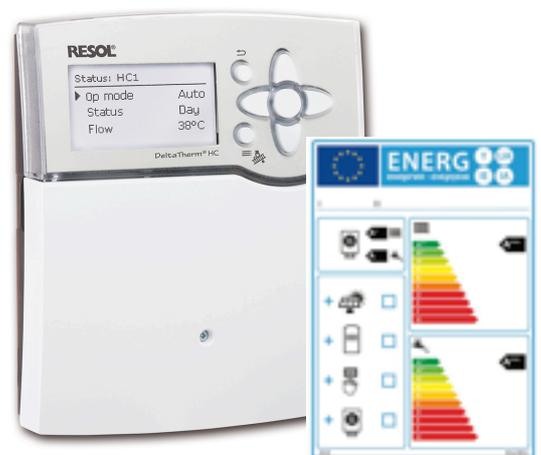

Hattingen, 23 September 2015

### Ready for the ErP Directive – simply easy with the DeltaTherm® HC

The approved RESOL heating controller can control a weather-compensated heating circuit, the DHW loading and the backup heating demand for both. Up to 6 weather-compensated heating circuits can be controlled by using up to 5 extension modules.

With the new DeltaTherm® HC you are able to reach the ErP temperature controls class VIII:

- Your advantage for energy labelling:  
Energy efficiency contribution of up to 5 %
- Modulating heating control with 0-10 V boiler control
- Weather-compensated control with room influence or demand-based room control with up to 5 room temperature sensors
- Remote access with a room control unit or the VBus®Touch HC App

RESOL also offers suitable ErP kits including a room control unit and the room temperature sensors required. Thus, complying with the ErP classes becomes even easier.

Further information about the DeltaTherm® HC and the large RESOL product portfolio can be found at [www.resol.com](http://www.resol.com)
