

## Visualise your system data

VBus.net is all about the data of your RESOL controller. Live data of your system, customised filter settings and much more await you.

VBus.net is available in 2 different versions: Basic and PRO. Easily usable with a DL2 (beginning with firmware version 2.0.0), DL3 Datalogger or KM2 Communication module.

## Remote parameterisation via Internet browser (PRO)

- Visualisation also for many mobile devices
- System access via the Web browser
- Data progress charts as live data displays or diagrams
- Optional publication of system data with only one click
- Personalised filters for customised data displays, downloads and reports
- VBus® Data Viewer – a plug-in for making diagrams out of externally stored data sets (also possible without a Datalogger/ Communication module)
- Save, distribute and restore your visualisation settings
- Display your daily yield as a bar diagram

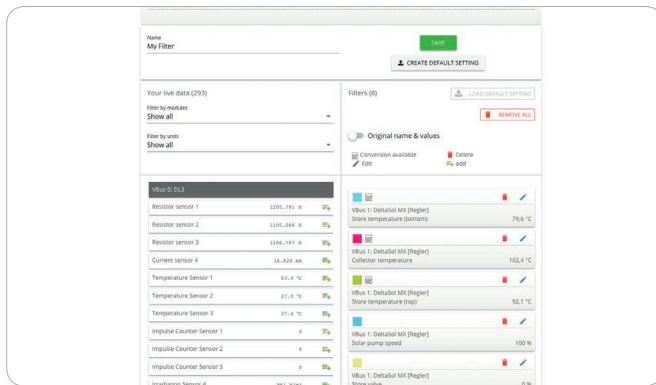

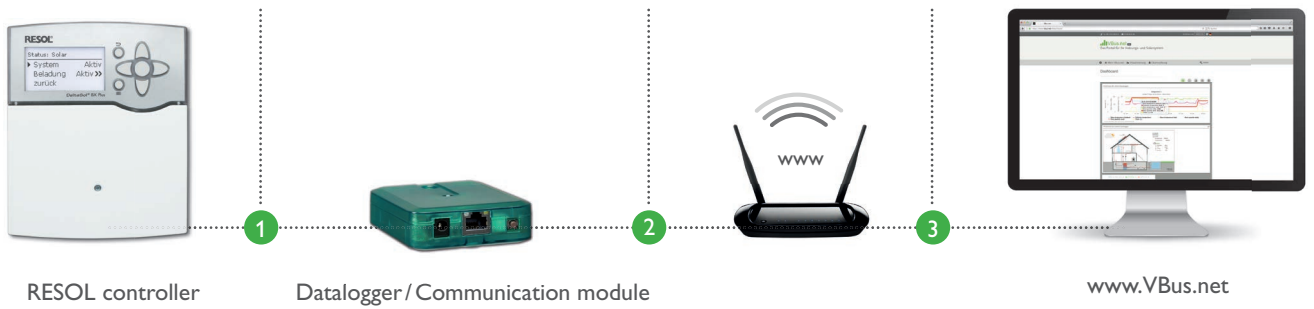

Functions	Basic	PRO
