

RESOL press release

Hattingen, 04 March 2013

New at RESOL's – the FK Solid fuel boiler controller

The **FK Solid fuel boiler controller** has been especially developed for systems with solid fuel boilers, water heating stoves or pellet stove heating systems. With the integrated PWM outputs, the FK can manage the speed control of two high-efficiency pumps. With its easily configurable optional functions, the versatile software allows e. g. for the control of an electronic mixer for the return mixing function, a thermostatic afterheating, a target temperature control function and many more.

- 2 relay outputs, 4 temperature sensor inputs
- 2 PWM outputs for the speed control of high-efficiency pumps
- Control of an electronic mixer for the return mixing function
- Heating backup
- Heat exchange function
- Thermostatic afterheating

Further information about the FK Solid fuel boiler controller and the large RESOL product portfolio can be found at www.resol.com
