

## RESOL press release

Hattingen, 16 January 2014

### High efficiency for all controllers – with the PSW pump signal converter series

With the pump signal converters of the PSW series it is easy, quick and cost-effective to tackle the conversion to high-efficiency pumps. The pump signal converters PSW Basic, PSW Premium and PSW Universal convert the speed control signal of the controller into an input signal suitable for an energy-saving high-efficiency pump. Thus, when replacing the pump, speed control can be enabled without replacing the controller.

Additionally, the PSW Premium pump signal converter is available as a full kit including a Wilo Yonos PARA pump. The pre-connected set saves installation time and effort and is available in different nominal widths.

Further information about the PSW pump signal converter series and the large RESOL product portfolio can be found at [www.resol.com](http://www.resol.com)
