

RESOL press release

Hattingen, 10 March 2014

High-efficiency pump specialists – the DeltaSol® CS controller series

The DeltaSol® CS controller series has been especially developed for the speed control of high-efficiency pumps in standard solar and heating systems. It is equipped with up to two PWM outputs and an additional input for a VFD Grundfos Direct Sensor™ that enables a precise heat quantity measurement.

The commissioning menu ensures an easy and quick configuration. Operation and menu structure are very similar to the popular DeltaSol® BS controller series, warranting for an easy transition between the different models.

Further information about the DeltaSol® CS controller series and the large RESOL product portfolio can be found at www.resol.com
