

RESOL press release

Hattingen, 10 March 2014

Versatile and easy to operate – the new DeltaSol® SLL

The DeltaSol® SLL is the smallest controller of the SL series. Its equipment is optimised for small and medium-sized solar thermal and heating systems in which high-efficiency pumps are to be used. 10 pre-configured basic systems are available.

The SLL is also the first controller of its category to offer the automatic function control according to the VDI 2169 directive.

2 microbuttons for quick access to the manual mode and the holiday function are located underneath the slidable housing cover, the SLider.

Additionally, it is equipped with a potential-free extra-low voltage relay for afterheating demand and a V40 flowmeter input for heat quantity measurement.

Further information about the DeltaSol® SLL and the large RESOL product portfolio can be found at www.resol.com
