

– Your competent partner in solar and heating controllers,
visualisation and more

CONTENTS

- VBus.net introduction
- VBus.net 4.0 – new possibilities
- Creating a live system (Basic account)

Welcome!

I am your host today

Tobias Jung

Product Manager

E-mail: tobias.jung@resol.de

Phone: +49 (0) 2324 / 96 48 767

We set standards...

- Modern production technology and a high production depth
- Up to 2000 controllers per day
- 100 % Germany-based production
- State-of-the-art quality assurance technology such as an AOI station, etc.
- TÜV-certified according to ISO 9001

Our own ideas...

- In-house Research & Development division
- Cooperations with universities and research institutes
- Extensive in-house lab facilities for electromagnetic and hydraulic testing
- Testing of our own as well as, if our customers so wish, third-party products under real-life conditions

Product overview

- Simple solar controllers
- Controllers for solar and combined systems
- System controllers

- Heating controllers

- DHW exchange controllers

- PV heating

- Accessories

VBus.net – What's new?

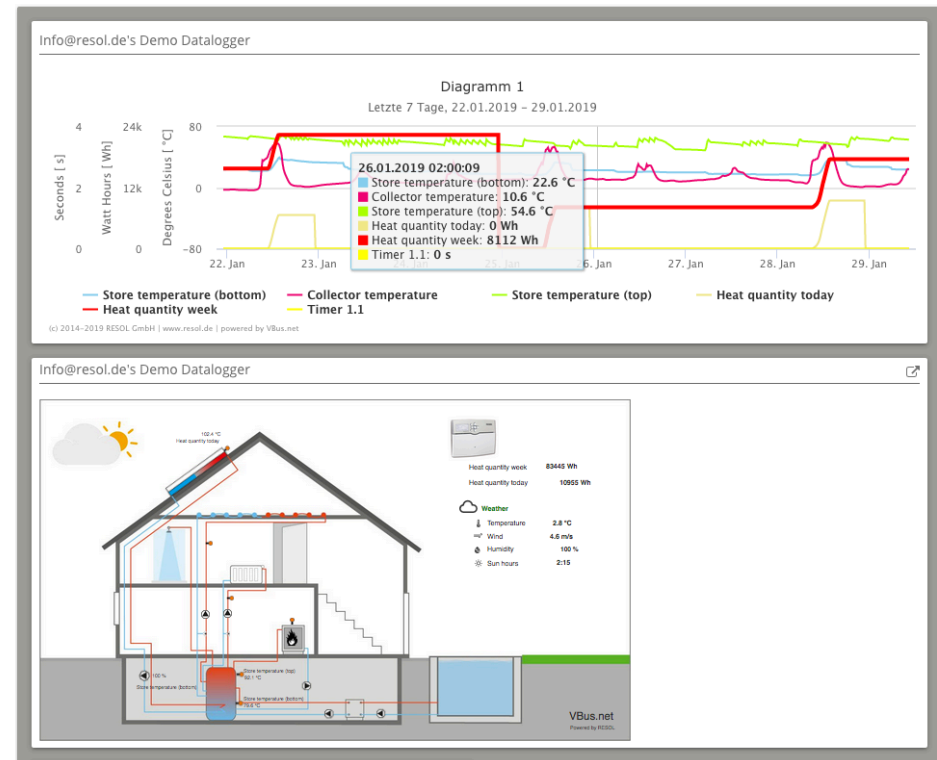

- New design – automatically adapts to your device
- Optimised graphical user interface
- Quick navigation for simplified operation
- Increased security through two-factor-authentication
- Guided live system creation
- More controller models supported for the Settings Documentation Generator

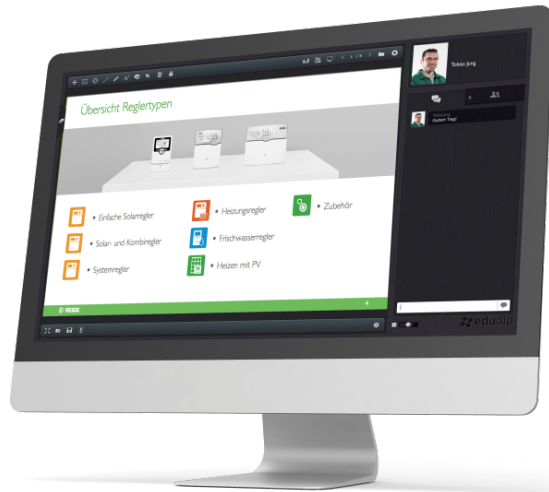

VBus.net – What's new?

- Flexible dashboard
 - Elements can be freely arranged
 - Create multiple dashboard layouts for different devices
- Extended filter settings
 - Free choice of display units and automatic unit conversion
 - Simple display and quantification of savings
- Integrated WebRPT
 - Parameterise your controller(s) via VBus.net

Thank you for your attention!
